Amounts are added to the web/app subscription fee. VAT is not included.

Concurrency is measured as people connected at the same moment.

viewer-h is total watch time (viewers × hours); participant-h is total time in video calls.

The amount in parentheses for live streaming and video calls is the per-hour rate charged on usage beyond the allowance (lower at higher tiers). Other rows (concurrency, file storage, etc.) are observed only and are not billed separately.

Overage applies only to KRW-billed subscriptions, and only once you have consented to overage billing in your office — nothing beyond the allowance is charged before you consent. Subscriptions billed in USD have no overage charge.

AI and high-usage APIs are quoted separately based on usage.

Tell us in advance if you expect to exceed an allowance — we will move you up a tier or quote it separately.
